

QUEST AFRICA CLINICAL LABS

&

DNA TESTING LAB

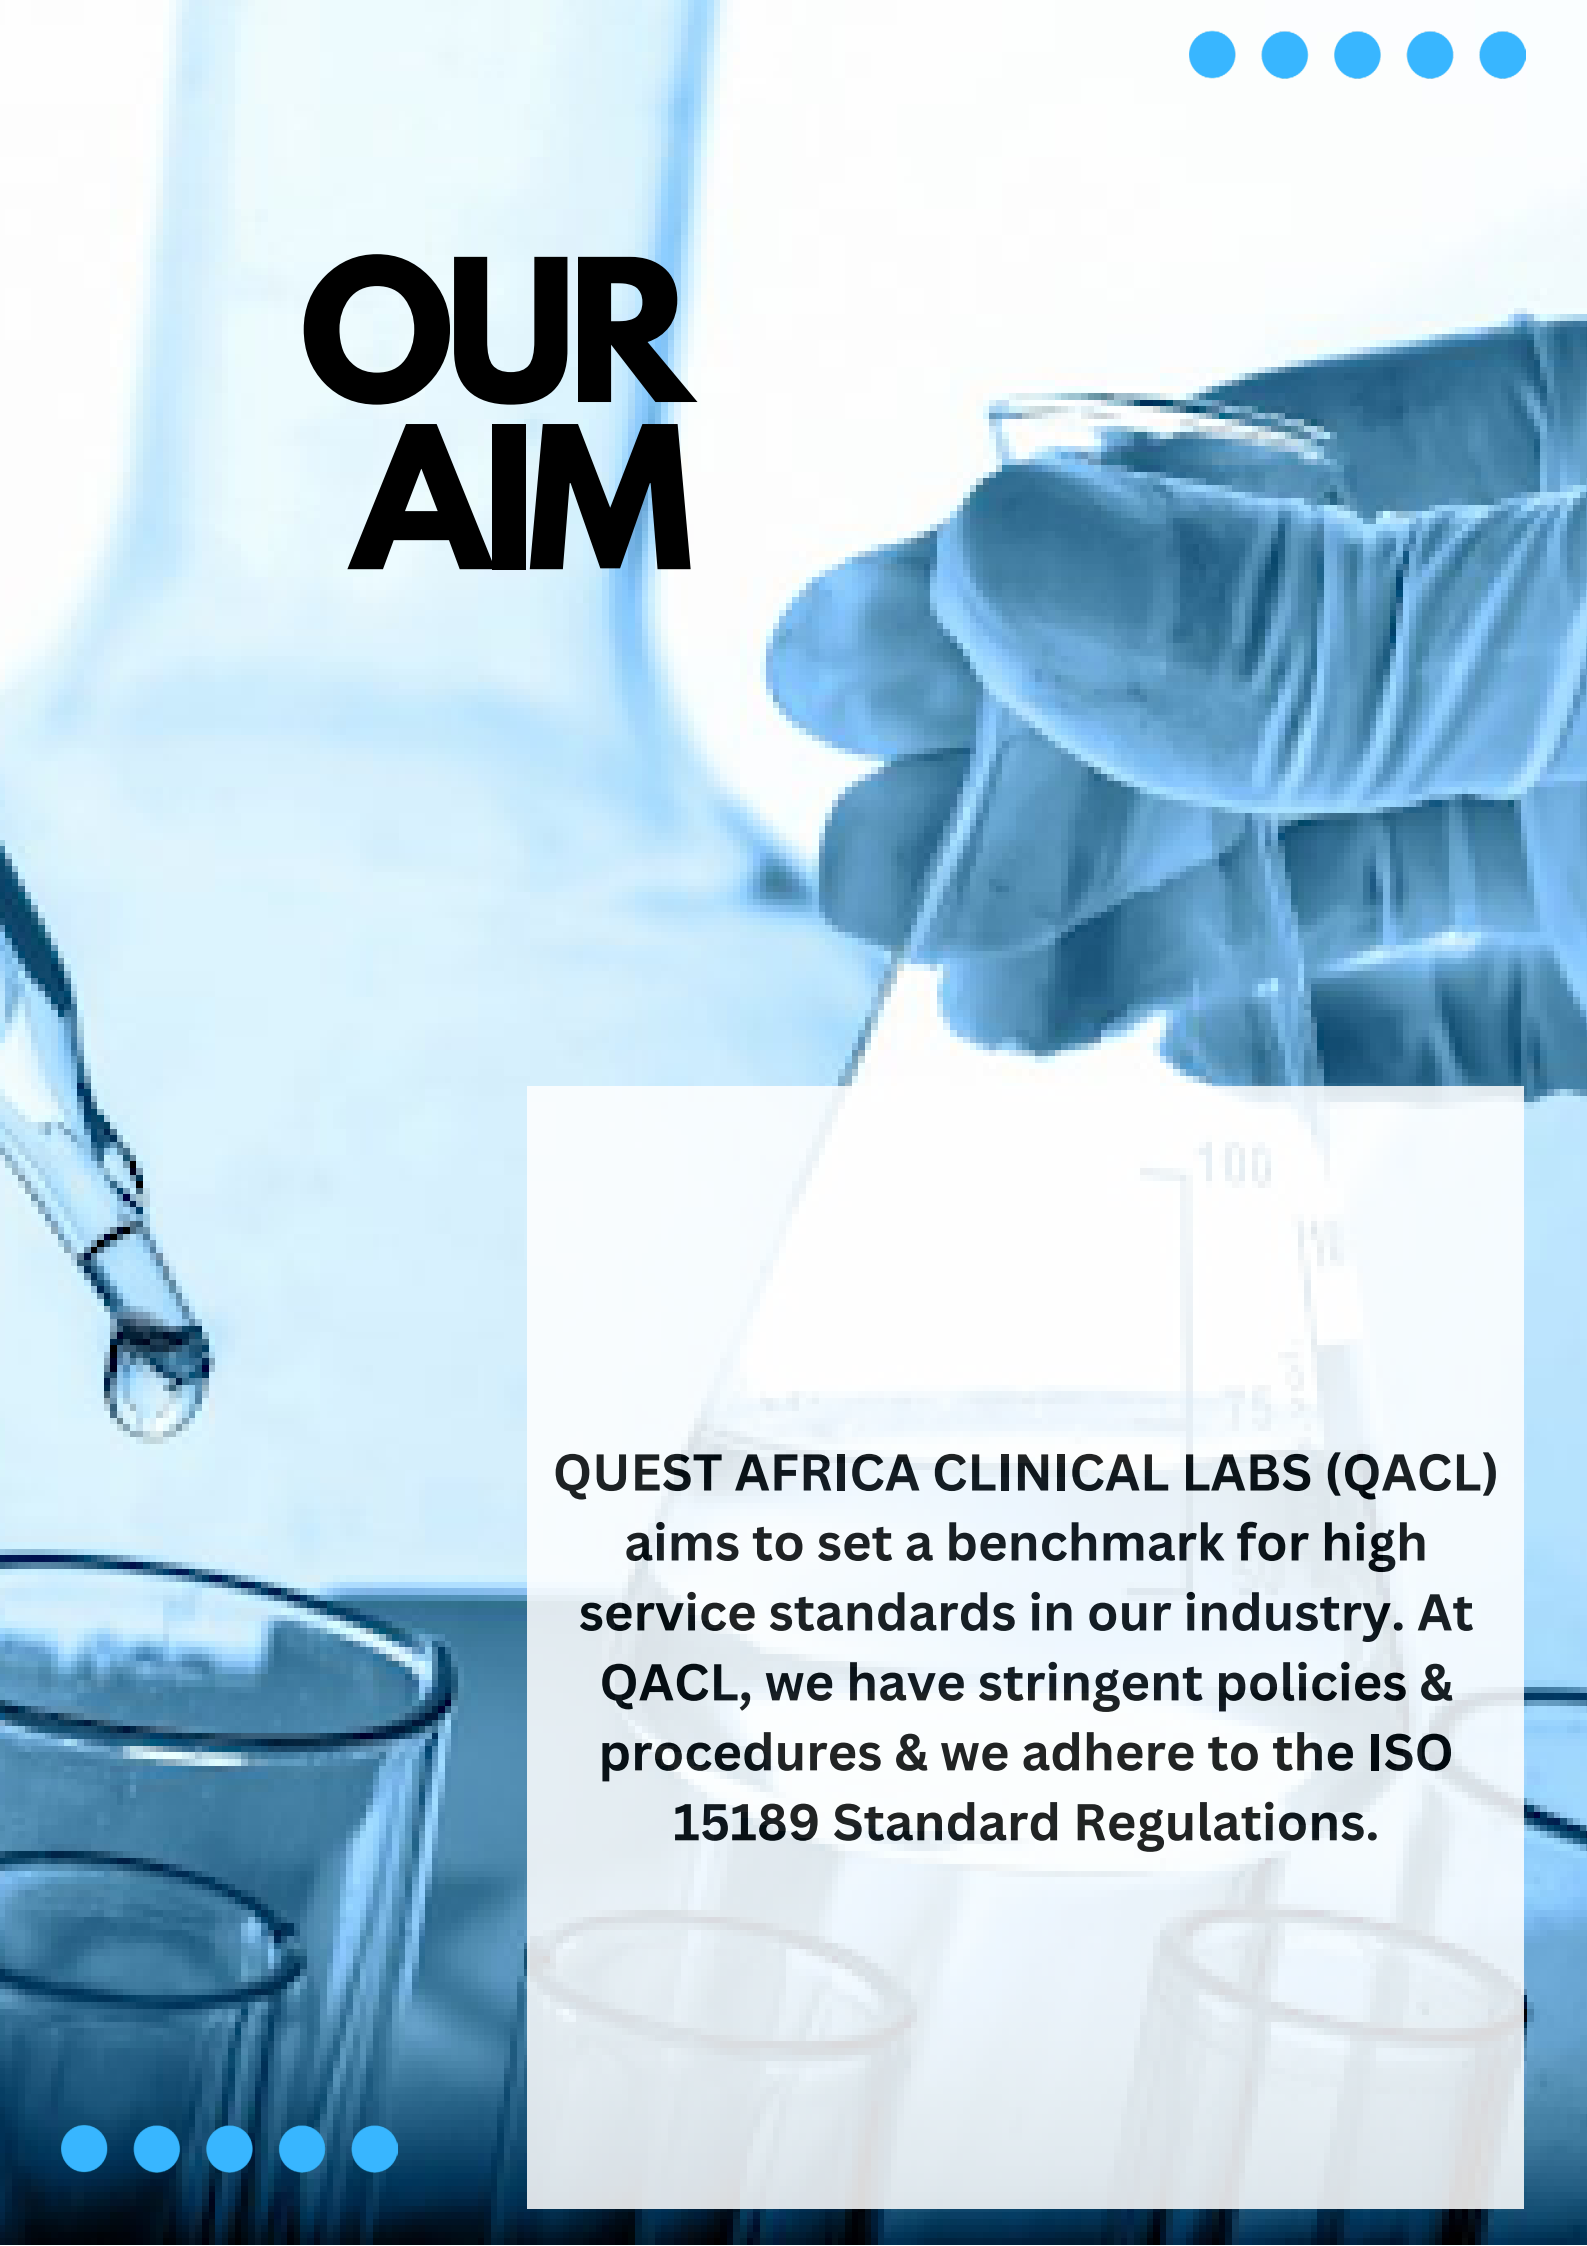

PR NO. 1105302

ABOUT US

QUEST AFRICA CLINICAL LABORATORIES (QACL) is a privately owned diagnostic laboratory that provides testing services to medical practitioners. We pride ourselves in our ability to tailor-make our services to the needs of our patients & our clients. The founder of QACL boasts over 20 years of laboratory experience gained at various reputable pathology laboratories.

OUR AIM

QUEST AFRICA CLINICAL LABS (QACL)
aims to set a benchmark for high
service standards in our industry. At
QACL, we have stringent policies &
procedures & we adhere to the ISO
15189 Standard Regulations.

OUR MISSION

QUEST AFRICA CLINICAL LABS (QACL) is committed to providing continued exceptional services by delivering high-quality & cost efficient solutions in order to meet the needs of our clients. We strive to exceed the requests of our clients to ensure that every detail is as per client specifications.

Our reputation has been built on the quality & accuracy of results we produce & in developing a service that meets the unique demands of each client. We are always eager to demonstrate how we have established & kept such a reputation.

Diabetes Monitoring (HBA1c, Average plasma Glucose, MicroAlbumin)
Arthrities profile (ANF, RF, ESR)

OPERATIONS

OUR TURNAROUND TIME (TAT)

In-house testing of samples is done within 2 hours of sample receipt, with results being available within 24 hours. All patient samples are treated with care & all results are checked & verified to ensure both accuracy & specificity of our testing machines & testing methods.

RESULTS DISPATCH

We utilize a specialised laboratory information management system (LIMs) to manage all records, patient information, doctor information, quality control & patient results. Once a patient's results is entered/verified/finalised into our system, the referring doctor (as well as copy doctors) are emailed directly from the system. Preliminary results are also emailed to the doctor should certain tests take longer than the 48 hour owing to them being tested in batches. Hardcopies are printed & sent to the referring doctor for their patient files. Our laboratory-based system allows doctors to view their patient results on their cellphone &/or tablet.
